1 Question No. 9

In Figure 1, $\angle BAC = 90°$,$AD \perp BC$, Prove that $AB^2 + CD^2 = BD^2 + AC^2$.

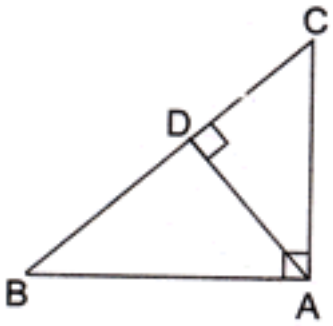

Fig. 1

2 Solution

In fig 1,$\triangle ABC$ where $AD \perp BC$, $\angle BAC = 90°$
To prove : $AB^2 + CD^2 = BD^2 + AC^2$
Proof :- Since $AD \perp BC$
$\angle ADC = \angle ADB = 90°$
In $\triangle ADB$, $\angle ADB$=90°
So, ADB is a right Triangle

$$\Rightarrow AD^2 = AB^2 - BD^2 \tag{2.0.1}$$

Also in $\triangle ADC$, $\angle ADC = 90°$
$\triangle ADC$ is also right Triangle

$$\Rightarrow AD^2 = AC^2 - CD^2 \tag{2.0.2}$$

From Both 1 and 2 we get
$AB^2 - BD^2 = AC^2 - CD^2$
$\Rightarrow AB^2 + CD^2 = BD^2 + AC^2$ (Hence proved)
